Virtual Workshop: Introduction to HPC

Dec. 14, 2026

10:00am - 1:00pm EST

ONE DAY ONLY - SPECIAL PRICING

Ready to start using the extensive computing resources of the Mantis cluster for your research? Gain hands-on experience accessing the Mantis cluster, navigating our 16 PB filesystem, accessing hundreds of bioinformatics software modules and databases, writing and running batch scripts, transferring data, and more.

No prior Linux, HPC, or bioinformatics experience required!

- Overview of Mantis cluster infrastructure and resources
- Accessing HPC via command line and Open OnDemand
- Navigating the filesystem and managing file permissions
- Accessing software modules and shared databases
- Writing and running batch scripts
- Transferring data

- Live sessions on MS Teams, recordings distributed
- No prior bioinformatics experience needed!
