

Workshop: Introduction to R

May 15th through July 31st (10 weeks)
Fridays from 1:00 to 2:00 PM EST

Learn the fundamentals of R for data science in this
10-week introductory workshop.

Participants will gain hands-on experience with importing
and organizing data, working with common data
structures, wrangling and tidying datasets, building
functions and pipelines, creating visualizations, and
performing basic statistical analyses. We will focus on
widely used data-science packages, including the
tidyverse, to help you develop practical skills for real
research workflows.

No prior programming experience required.

Cost: \$600(\$500 for UConn affiliates)

Where: UConn Storrs Campus (room TBD)

Register now: <https://bioinformatics.uconn.edu/cbc-workshops/>
